

Health Gather

"Health Gather" is built on innovation and excellence. Our team of experts is focused on harnessing the latest technology to revolutionize healthcare, with the ultimate goal of improving the quality of life for every individual. We are not only shaping the future of healthcare but also actively exploring new possibilities to deliver precise, personalized solutions.

Our vision focuses on patient-centered care, developing advanced tools that prioritize precision and personalization. A key project is our AI-powered app, which integrates image analysis with smartphones to non-invasively assess pallor in the conjunctiva and jaundice in the sclera—crucial for in vitro diagnostics, particularly for conditions like anemia and jaundice. By enabling real-time monitoring, the app allows healthcare providers to detect early changes in a patient's condition and deliver timely interventions. Our goal is to create accessible solutions that empower individuals with personalized health insights, ensuring they receive the right care at the right time.
